

STAINLESS STEEL DOORS

Wrap around sliding doors are not a new innovation for Lincs Doors, they are doors we manufactured many years ago.

The market is now changing its ways to reduce the amount of aluminium in a sliding door and requesting the bespoke sliding doors as an alternative with stainless steel frames and trims.

Benefits of wrap around sliding door with stainless steel frame

- > Doors withstand chemical washes better because the white food safe laminate is wrapped around the door leaf with flush silicone joints.
- > The frame is stainless steel therefore eliminating as much aluminium as possible, which is required for certain environments.
- > The finished look is aesthetically pleasing as there are minimal dust traps.

- > Freezer or Chill temperature
- > Made to measure
- > Core thickness 75mm, 100mm or 125mm
- > PIR core
- > Choice of colours in food grade metal
- > Easy to install
- > Fermod track
- > Stainless steel canopy made to measure
